SUMMARY

B.Sc. Information Technology graduate with hands-on experience in Unity game development and frontend web development. Skilled in C#, Unity, gameplay programming, UI development, and debugging. Seeking opportunities in game development and software development..

QUALIFICATIONS

B.Sc. IT | 2023 – 2026
Chetana's College

WORK EXPERIENCE

Frontend Developer Intern | Intern Intelligence (Remote) **:** March 2025

- Developed frontend components using HTML, CSS, and JavaScript.
- Created responsive and user-friendly website interfaces.
- Improved website layouts and visual consistency.

Game Development Intern | Blackhole Infiverse **:** Jan 2026

- Contributed to the development of Yuddhabhumi, a VR game for Meta Quest.
- Developed and implemented gameplay mechanics and UI features using Unity and C#.
- Worked on VR interactions, debugging, and gameplay optimization.
- Collaborated with team members to develop and improve game functionality.

PROJECTS

Yuddhabhumi – VR Game

- Contributed to the development of a VR game for Meta Quest during my game development internship.
- Worked on gameplay systems, UI features, and VR interactions using Unity.

Project link: Yuddhabhumi

Grow A Monster – Roblox Game

- Developed and publicly published a monster-growing simulator using Roblox Studio and Luau.
- Implemented egg hatching, monster growth, mutations, in-game economy, shops, and player data saving.
